Terrazzo is a style with irregular patterns of chips spread over a surface. This collection consists of tiles that have patterns ranging from small, medium to large-sized chips, each inducing different aesthetic values.

# HISTORY OF TERRAZZO!

Terrazzo was one of the first flooring materials created thousands of years ago by the ancient Romans from the chips left over from work with marble and stone; bound with cement, Coloured with natural oxides and blended with water. This series combines the durability and strength of vitrified tiles with the look and finish of Terrazzo, is low maintenance and hence can easily be cleaned. They are suitable for both indoor & outdoor use in low and medium traffic areas, commercial and residential environments that require a sophisticated, durable and classy flooring finish. Terrazzo is currently back in fashion and has taken over homes and hearts across the world as a flooring option in luxury interiors such as bathroom floors, reception areas, wall claddings among many others thanks to its versatile look.
